

# Hi-Low™ VARYING HEIGHT COIL SYSTEM

This unique fabric encased innerspring manufacturing process is only available from Leggett & Platt. Utilizing specially automated technology that strategically positions coils of varying heights in the same row, Hi-Low maximizes product comfort, support, and versatility.

Hi-Low can be configured in numerous ways, offering incredible design flexibility and exclusivity potential. The process can also be combined with many standard or proprietary fabric encased innerspring systems, enhancing an established product range or developing new marketing possibilities!

Opportunities include:

- Conventional Zoning
- Checkerboard
- Cavity-Filled

All available single- or doubled-sided, in varying heights and unit sizes.

This exclusive process has been made possible by the development of protected fabric encasing machine technology by Leggett & Platt.

#### ACTIVE SUPPORT TECHNOLOGY®

The **Active Support Technology®** of innersprings relaxes your muscles during natural sleep movements, comforting and supporting your body during a good night's rest.

*Leggett & Platt*<sup>®</sup>  
INCORPORATED

Innersprings sleep  
up to 28% cooler than foam.\*

#### The industry leader

Leggett & Platt is a diversified manufacturer (and member of the S&P 500) that conceives, designs, and produces a broad variety of engineering components and products for the bedding industry and other market sectors worldwide.
