

Low-Profile Fabric-Encased Coil...at 2.4" tall this encased coil is ideal for placement in Euro and Pillow Tops, or any application you can dream of to add a plush feel to your mattress.

- Each coil is manufactured from high-tensile wire and stress-relieved for lasting resiliency.
- Each coil has a pre-load when encased in the fabric for enhanced resiliency, support, and eliminates permanent coil-set.
- Each coil is encased in high-quality, high-density specially designed fabric. This fabric is designed to minimize friction and noise while maximizing wear strength.
- Coils are encased by ultrasonically welding the fabric. This creates a high-strength bond between each coil and along the top of the encasement.
- The Micro Fabric-Encased Innerspring sleeps cooler and is less expensive than latex or visco foam.
- Each row of individually encased coils is precisely positioned by a robotic arm, then bonded to the outer fabric. This creates a consistent distribution of support throughout the unit.
- ISO 9000 compliant and LP 9000 certified.

ACTIVE SUPPORT TECHNOLOGY®

The **Active Support Technology®** of innersprings relaxes your muscles during natural sleep movements, comforting and supporting your body during a good night's rest.

Unit Coil Counts

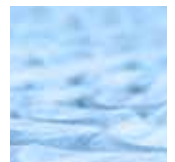

Twin	Twin XL	Full	Full XL	Queen	King	Cal. King
798	861	1102	1189	1353	1722	1702

Less expensive
than foam.

PROVEN to sleep
up to 28% cooler.*

Leggett & Platt®
INCORPORATED

An industry leader bringing you a new industry standard.

Leggett & Platt is a diversified manufacturer (and member of the S&P 500) that conceives, designs, and produces a broad variety of engineering components and products for the bedding industry and other market sectors worldwide.
