

superlastic[®]pro HIGH-PROFILE COIL

continuous coil innerspring

OFFERS PRODUCTION FLEXIBILITY, CONSISTENT QUALITY

Re-engineering takes this industry standard from good to great! Now a 7" high-profile coil, **Superlastic[®] Pro** combines high-tensile, fine-wire technology with a newly innovative design. A unique, precision-controlled manufacturing process provides production flexibility, productivity, and consistent quality.

What's New:

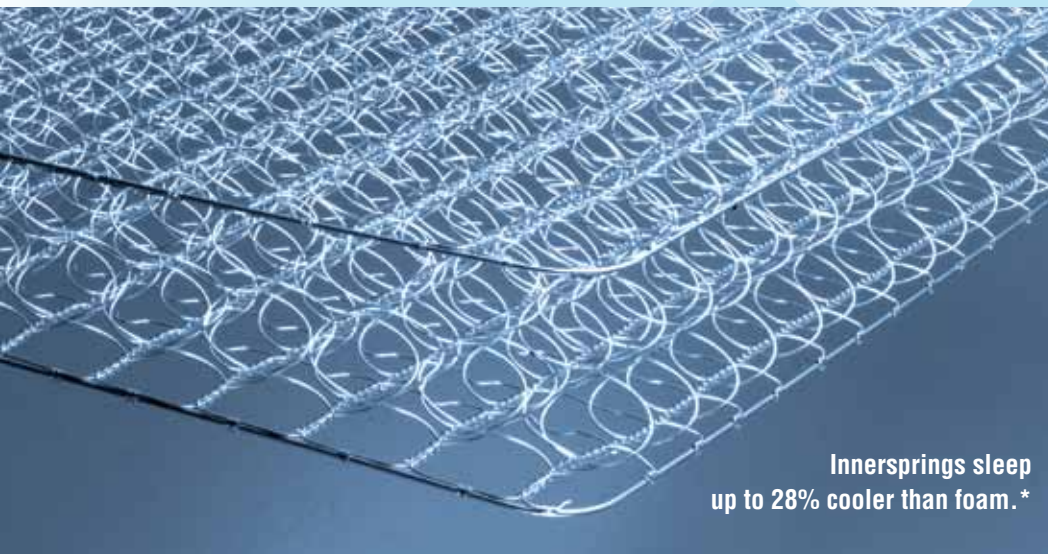

- Taller coil progressively firms as it's compressed; support strengthens naturally with added body weight
- High-profile 7" coil adds comfort with height; no excessive, costly foam and fiber layers necessary
- Head-to-foot laced helicals stabilize to reduce motion transfer; promotes less partner disturbance
- High coil counts for better weight distribution and conformity to body shape
- Special interconnected rows of springs optimize stability and body support – noiseless performance
- 100% working wire – every part of the surface flexes. Highly efficient performance provides greater comfort and support with economical use of wire; lighter weight unit is easier to handle

The **Active Support Technology[®]** of **innersprings** allows your muscles to relax in a more natural position.

The **coils adjust instantly** to your sleep movements, **comforting and supporting** your body actively as you dream on.

Unit Coil Counts	Twin	Twin XL	Full	Full XL	Queen	King	Cal.King
520/630	360	378	520	546	630	798	792
624/780	432	468	624	676	780	988	972
624/780FE	396	432	528	576	672	864	884

Innersprings sleep up to 28% cooler than foam.*

Leggett & Platt[®]
INCORPORATED

The industry leader

Leggett & Platt is a diversified manufacturer (and member of the S&P 500) that conceives, designs, and produces a broad variety of engineering components and products for the bedding industry and other market sectors worldwide.

Leggett & Platt[®]
